BD SENSORS® pressure measurement

Ordering code DS 4

DS 4 ☐☐☐-☐☐☐☐-☐-☐-☐☐☐-☐☐☐-☐-☐☐☐-☐☐☐

Pressure																														
gauge	6	8	0																											
Input [bar]																														
1.0				1	0	0	1																							
3.5				3	5	0	1																							
10				1	0	0	2																							
-1 ... 0				X	1	0	2																							
customer				9	9	9	9																							consult
Number of contacts																														
1 contact								1																						
2 contacts [1]								2																						
Analogue output																														
without analogue output										0																				
1 ... 5 V / 3-wire [1]										C																				
Electrical connection																														
M8x1 (4-pin)												Q	0	0																
customer												9	9	9																consult
Mechanical connection																														
G1/8" internal thread															Q	0	0													
M5 internal thread with slot for O-ring [2]															R	0	0													
customer															9	9	9													consult
Seals																														
NBR																		5												
customer																		9												consult
Setting code																														
BD SENSORS standard [3]																			0	0	0									
setting according to customer [3]																			9	9	9									consult
Special version																														
standard																							0	0	0					
customer																							9	9	9					consult

[1] with optional analogue output max. 1 contact possible

[2] possible with flange

[3] Parameters can be programmed by customer either with the programming kit CIS 680 / CIS 681 or with the programming device P6 (available as accessories).

This ordering code contains product specification; properties are not guaranteed. Detailed information about options are defined in the datasheet. Subject to change without notice.
